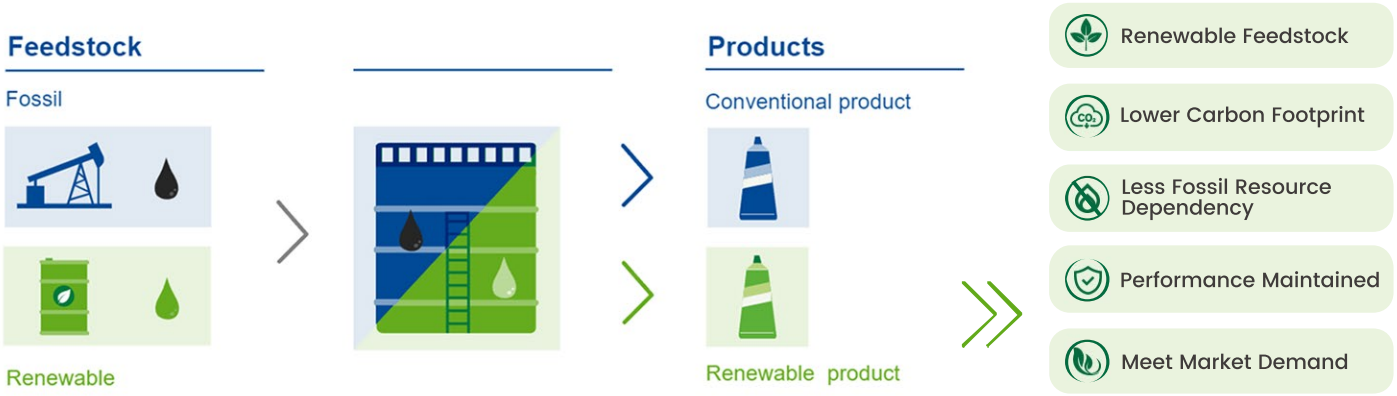
From Renewable Feedstock to a Zero-Mess Kitchen

Oven Turkey Bag, Slow Cooker Liner & Pan Liner, Elevating Your Cooking Experience Sustainably.

Modern life brings convenience, but also increasing pressure on the resources we depend on. As sustainability becomes an increasingly important consideration, renewable materials offer an alternative pathway to conventional fossil-based resources.
At Xiamen Threestone, we provide renewable material solutions for flexible packaging that balance sustainability, functionality and performance.

Why Renewable Material?



Better Materials, Measurable Benefits, Credibility Certificates.

Benefits your products

- 100% sustainably sourced renewable feedstock
- Saving of fossil resources and reduction of CO_2 footprint
- High quality identical performance

Certificates for high credibility

- Fossil resources saving product.
- Fossil resource saving product by usingrenewable raw materials in the value chain.
- The replacement of fossil through renewable feedstock reduces the greenhouse gasemissions by x t CO_2 equivalents per t product.
